--> Comment Text :
There were deadly ramifications to the, "Yucca Mountain Project" even BEFORE the horrifying September 11th incident. Now, the \$170,000,000 project would be much worse involving terrorist action which is a threatening, ominous cloud that continues to be over all of us. Already with the future continuous worry of one of, "100,000" trucks hauling nuclear waste (25 year period) into Las Vegas...one truck accident and a small amount of radioactive waste spreading over a "42 square mile area" which is indeed a worry in itself among many other major concerns.....WE NOW would have OTHER HUGE concerns as to, "terroristic action" upon Yucca Mountain itself. The State of Nevada has already seen enough human SUFFERING from radioactive damage in the past..and goodness know, this state doesn't need to see anymore!
